

## Seasonal Outlook Report Service

**“We’ve already saved two million in gas purchases (this season) with the help of your forecast analysis.”**  
**– Steve Kennedy, Cognis Chemicals**

First Enercast Financial delivers world class seasonal forecast analysis in a monthly report format. Utilizing the most recent advancements in long range theory, research and supercomputing technologies, the Outlook provides reliable and comprehensive insight for six-months ahead. Detailed weather discussion breaks down the major model outputs and relates them to the energy market impact. The end result is a product designed to deliver a significant seasonal market advantage allowing users to make educated market decisions.

### ENERGY PRICE FORECAST

Assembling a seasonal price forecast based on the HDD / CDD forecast, EIA storage analysis, and climate impact. Full comparison to other industry forecasts.

### WEATHER-DRIVEN DEMAND ANALYSIS

Degree-day forecast and discussion, broken down by consuming region and cities, including HDD / CDD strip info and CME weather contract valuation analysis.

### EIA STORAGE ANALYSIS

Long term storage model takes into account weather and macroeconomic factors on energy demand.

### CLIMATE IMPACT STATEMENT

Analysis of the FEF ensemble model and major climate influences such as NOAA, El Niño, sea surface temperatures, and review of experimental model output.

#### Subscriber Feedback:

“So far this winter, Enercast has been remarkably accurate in its weather predictions...” —**Wall Street Journal**

“Thanks for this month’s Climate Impact Statement. We rely on it regularly in our monthly planning sessions.” —**Austin Energy**

“We look forward to receiving this report each month and rely on it for our energy planning.” —**Pacific Gas & Electric**

“Absolutely the best seasonal fundamental analysis available for natural gas.” —**CIBO**
